

Response Quick Step Guide

Homework: Impromptu

The Homework Impromptu mode allows students to use their clickers at home to record their answers for paper-based assignments. This feature can also be used on field trips to capture responses to oral questions. Data that is inputted into the PRS RF is stored on its memory and can be uploaded to Response at a convenient time. Note that this feature is only available with PRS RF.

Completing the Homework Assignment

1. **Turn on** the clickers.
2. As the clickers begin to scan, press the asterisks and you will see **Scanning done. No classes found.**

3. Press the  twice and stop once you see **Setup menu Homework 1.**

4. Press .
5. Press  again until you see **HMW: Enter test #.**

6. Enter the **Test #** and press **Enter**.
7. Press  one time to go to the first question. It should say **H01.**
8. Type the response and press **Enter**. The clicker will verify the answer was saved.

9. Press  one time to go to the next question, repeating this process until all questions have been answered.
10. Once the assignment is completed, **turn off the clicker**. All responses are stored on the clicker and can be downloaded at a later time.

Response Quick Step Guide

Collect Homework Responses from the Clickers

1. Select **Collect Responses** from main screen.

2. The Collect Responses-New Session dialog box will appear. **Enter a name** for the session.

3. **Select your class** that you created earlier.

4. Select the Subject or Section, if appropriate.

5. Select **Homework** as the Type of Session you are going to run.

6. **Select the answer key** created in the previous section.

7. Select **Impromptu** as the **Lesson Type**.

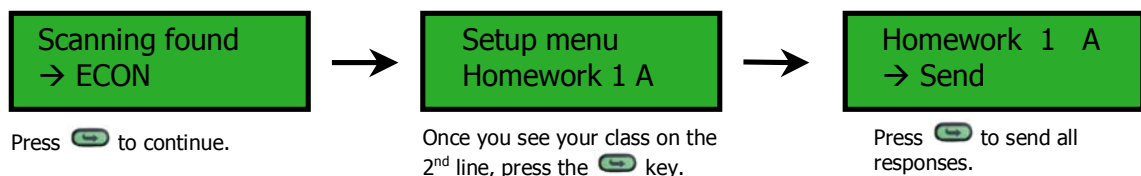

8. Click on the **OK** button to accept the settings.

9. Now you will see the **Impromptu Options**. Most of these fields can be ignored when running a Homework mode with an answer key. The only recommended option for this mode is the **Timer**.

10. The **Session Toolbar** will appear giving you the information needed to join the class.

11. Once you see the frequency available on the yellow RF Status Bar, **turn on the clickers**.

12. After collecting the responses of the homework assignment, you may **end the session**.
