

Response Quick Step Guide

Install PowerPoint Add-in (PC)

Response provides a PowerPoint integration that can transform your existing PowerPoint slides into Response questions with the click of a button so you don't have to change the way you teach.

1. Once you install Response on your Windows system, the PowerPoint Add-in toolbar is automatically added to your PowerPoint (version 2000 or newer).

2. In case you don't find it here, look in your list of toolbars and make sure it's checked off (PowerPoint 2003 and earlier).
3. If you have followed the above steps and still don't see the Response toolbar, you will need to install the add-in by accessing it through your *Start Menu or Applications* folder: Interwrite Learning > Interwrite Response > Install support for PowerPoint.
4. If at any time you wish to uninstall the Response Toolbar from PowerPoint, follow these same steps and look for Uninstall support for PowerPoint.
